## UECP JSC Quality Policy

**U**rals Electrochemical Plant Joint-Stock Company is the largest in the world company providing uranium enrichment services for nuclear industry applications.

UECP JSC understands that the quality of the supplied product and services (hereinafter referred to as product) shall govern the safety, quality and operating efficiency of nuclear facilities. The mainstream of the company activity in the field of quality is to build and maintain the reputation of the high quality and competitive product supplier for the domestic and international market.

UECP JSC activity in the field of quality shares the following principles:

- leadership and management to ensure nuclear, radiation, industrial and fire safety, occupational safety, environmental protection in accordance with applicable regulatory documents
- best meet the expectations and demands of customers, suppliers, employees, community and other stakeholders
- manufacture competitive high quality product and ensure its compliance with applicable requirements
- constantly improve the product and process quality
- ensure reliability of enrichment production, maintain its accident-free operation, perform its

upgrade and retrofit.

The core principle of the company operations is quality and safety come first.

For the purpose of implementation of the above principles, TVEL JSC and ROSATOM State Atomic Energy Corporation quality policy, thereby ensuring the peaceful use of nuclear energy, UECP JSC management is committed to:

- ensuring effectiveness and constant improvement of operational UECP JSC Quality Management System in compliance with ISO 9001, ISO 19443 requirements
- contributing to further upgrade of UECP JSC operations, focused on constant improvement of product, service and operation quality, with top the priority given to safety of production process and development of safety culture
- providing resources necessary for implementation of stated principles.

UECP JSC employees undertake to implement the Quality Policy, strive to work as one team and look for mutual understanding and cooperation with all stakeholders.
